I. UVOD

1) Korišćeni programski jezici

U okruženju NetBeans, koristio sam programske jezike HTML, PHP, Javascript.
Biblioteke iz CodeIgniter-a : form_validation, database, session, table.

Helperi iz CodeIgniter-a : url, form, date

Ostalo : JQuery, Bootstrap

2) Opis funkcionalnosti

Sajt ima u celosti dinamičku strukturu – od glavnog menija, do ankete, koja preko javascripta šalje ocene, na linku administracija se može u većini sve dodati, obrisati, promeniti sa sajta (glavni meni, mogu se dodati nove ankete, sekcija Istaknuto je isključivo dinamička, sve se čita iz baze, i po datumu isteka se prikazuje. Slideshow je takođe dinamičan – slike se dodaju u bazu preko admin panela, mogu se promeniti korisnici).

Mogu se još promeniti linkovi u glavnom meniju, sekcija Promo, Galerija, Rezervacije, Smestaji, Sezone.

4) Korišćeni CSS

Nema tuđeg CSS-a, osim što sam koristio plus i Bootstrap, zbog responsive design-a, gde god mi je bio potreban, tj. njegove klase, ali će se sve videti u kodovima.
